WHO WE ARE

The Centre for the Commercialization of Antibodies and Biologics (CCAB) provides expertise in product and business development to rapidly translate academic discoveries toward achieving a sustainable impact within the healthcare system and the broader scientific community. C-Lab is a protein production and characterization facility operating within the CCAB. Work with us to access in-house capabilities in the development of therapeutics, diagnostics, and reagents, with the support of start-up companies in these areas.

SERVICES AVAILABLE AT C-Lab

- **Antibody and Protein Production**
  - Transient mammalian expression system with Protein A purification

- **Antibody Characterization**
  - Binding assays and biophysical characterizations

- **Custom Solutions**
  - Optimized purification strategies

- **Plasmid Services**
  - DNA Amplification

- **Antibody Engineering**
  - Rapid reconfiguration of your antibody species and/or isoform

- **Reagent Products**
  - Access to a portfolio of validated antibody reagents
