

CCAB focuses on commercialization and pre-clinical development of early stage therapeutics in Canada:

- We provide business and product development expertise as well as in-kind services
- We partner with **investors** and **seed stage companies** to develop pre-clinical validation packages and financing strategies
- This includes matching investment for advancing key pre-clinical proof-of-concept studies as basis to attract additional investment capital and to form new start-ups

**Seed stage biotech
therapeutic company**

- Lead candidate(s) or discovery platform under pre-clinical development
- Initial investment (incl. non-dilutive funding) and equity

- Contributions to match and multiply seed investment
- Business and product development expertise

Pre-clinical Development Partnership

- Co-develop program plan to advance pre-clinical development towards IND
- Set milestone and define goals, incl. corporate, financing and scientific strategies

- Direct development plan
- Build out scientific validation and clinical plan
- Develop pre-financing marketing

- Manage pre-clinical development program to ensure progress
- Support company to advance financing incl. compiling validated pre-clinical package

Financeable company – Series A and beyond

- Lead candidate(s) with actionable clinical plan
- Scientific elucidation and potential platform
- Experienced management and staff with well-organized corporate structure

We pursue the formation and growth of single and multi-asset start-up companies, through various models, as part of our goal of growing the biotech community within Canada.

Supporting Entrepreneurs. Attracting Investments.
